Summary

I am a dedicated student from the extensive biological and ecological background and am driven to tackle the challenges in neuroscience. My favorite quote: 'Learn the rules like a pro, so you can break them like an artist by Pablo Picasso. I am on the way to becoming more versed in it while being engaged in a fun project.

Experience

Bachelor Thesis in Molecular Microbiology Molecular Ecology Lab, NAU

03/2021 to 06/2022

Nanjing, China

- 66 strains of *Bacillus* bacteria were successfully isolated from soil samples and clustered into a dozen of Operational Taxonomic Units based on the phylogenetic tree of 16S rRNA sequences of the isolates.
- This work contributed partially to a national survey of biodiversity in China.

Research Internship in Electrophysiology Department of Biology, Lund University

04/2022 to 05/2022

Lund, Sweden

- Electrical activities in human iPS neural organoids cultured on MEA were recorded under three gradients of environmental carbon dioxide concentrations.
- The recording was analyzed with custom MATLAB scripts for inferring how background CO2 changed the firing activities of the cells in the organoid.

Research Internship in Photoreceptor Modeling Department of Biology, Lund University

11/2021 to 03/2022

Lund, Sweden

- MATLAB App is written for calculating the optic parameter of the photoreceptor with user-defined inputs (deposited in GitHub; account: sherrxyz).
- Photoreceptor distributions on the compound eye of 14 fan worms of the two species were manually reconstructed from the 3D confocal dataset. The results are to be incorporated into a manuscript for publication.

Research Internship in Drosophila Development Pesticide and Toxicology Lab, NAU

03/2021 to 04/2021

Nanjing, China

 Ovaries of dozens of fruit fly females were dissected, and a few of them with asymmetrical morphologies were cased into immunohistochemistry samples ready for detecting the expression of transmembranechannel-like proteins (TMC).

Research Internship in Plant Physiology Plant Physiology and Nutrition Lab, NAU

12/2020 to 02/2021

Nanjing, China

- DNA sequence homology analysis was made of the 23 paralogs of the flowering-timing gene FLOWERING LOCUS T in the genome of garlic and 3 orthologs from rice and *Arabidopsis thaliana*.
- The result provided a piece of clue for answering why some garlic germinates earlier than others, a scientific question the host lab was interested in.

Research Internship in Molecular Psychiatry Institute of Neuroscience, Gothenburg University

11/2019 to 01/2020

Gothenburg, Sweden

- The role of quaking gene on the pathogenesis of Schizophrenia was examined on zebrafish as the model system.
- Abnormalities in key brain structure of the mutant zebrafish larva were detected on the dataset of confocal
- Literature on myelination and psychiatry disorders were intensely read.

Teaching Assistant in 'evolutionary biology' College of Life Science, NAU

09/2018 to 06/2019

Nanjing, China

 Assisting attending students with assignments, grading quizzes and exams, making and spreading posters for promoting the course.

Skills

- Written & spoken academic communication
- · Comprehending research literature
- Formulating and testing the hypothesis
- · Creative problem-solving
- Adopting protocols
- Insect feeding and dissection (*drosophila*)
- · Culturing microorganisms on Petri dish
- Immunochemistry sample preparation
- Nuclei extraction

- R language for plotting figures
- Image analysis on Fiji
- · Phylogenetic tree building with MEGA
- MATLAB programming
- Data processing with EEGLAB
- Electrophysiological recording with Multi Channel Systems
- Titration
- · Flow cytometry

Education

Bachelor of Agriculture: College of Resources and Environmental Sciences

2021

Nanjing Agricultural University

Nanjing, China

- Dissertation: Classification of Bacillus Species Isolated from the Soils of Three Ecosystems in Inner Mongolia Based on 16S rRNA Sequences.
- Coursework in Plant Physiology, Molecular Biology, Ecology, Biotechnology, Microbiology, Organic and Inorganic Chemistry, Earth Science, Further Mathematics, Physics, and Academic English
- Academic Achievement Awards: National scholarship for merit student (2018), Huang Rui-Cai Fellowship (2019)

Exchange: Department of Environmental and Biological Sciences

2019

Gothenburg University

Gothenburg, Sweden

• Coursework in Ecotoxicology, Genetically Engineered Food

Graduate studies: Department of Biology

2022

Lund University

Lund, Sweden

· Coursework in Neurobiology, Molecular Biology

Conference

Effective Altruism Global X, Berlin, September 2022

Books influential to me

- Buzsaki G. Rhythms of the Brain. (2006)
- Lanza R, Berman B. Biocentrism: How life and consciousness are the keys to understanding the true nature of the universe. (2010)
- Pater W. Studies in the history of the Renaissance. (1983)
